DKC80-53

... a widely adapted maize hybrid

Medium maturing hybrid with good stability (120-140 days)

FEATURES	ADVANTAGES	BENEFITS
1. Medium maturing hybrid (120-140 days) with good stability	- Adapted in the Medium and Medium-late ecologies	- Guarantees food on the table in these ecologies - Assures a harvest even at moderate input farming
2. Prolific hybrid with flint grain	- Stable yielder - Good grain quality with better storability	- Assures a harvest across locations e.g coffee zones - Good storable grain with excellent milling qualities
3. Medium stature	- Good standability - Easy to harvest by hand	- Yield losses as a result of lodging minimized - less tedious harvest operation
4. Good tolerance to diseases (esp. GLS, MSV, Blight and rust)	- Highly adapted to disease prone areas	- Crop yield losses from leaf diseases minimized

DKC80-53: A widely adapted medium maturing GSL tolerant maize hybrid
