DKC80-73

... a high yield hybrid maize

Mid-late maturing hybrid maize which matures in 150-180 days. DK80-73 is a white grained hybrid with a flinty texture which gives it good poundability quantity and also makes it tolerant to storage pests.

FEATURES	ADVANTAGES	BENEFITS
1. Prolific	- Reliable yielder	- Excellent performance potential 7-10 tons/ha - Good storable grain with excellent milling qualities
2. Medium Stature	- Good standability - Good grain quality with better storability	- Less lodging - Easy to harvest
3. Uniformity	- Same time harvesting	- Less tedious harvest operation
4. Good-flint grain type	- Tolerant to storage pests - Good for roasting	- Less grain loss
5. Hybrid with excellent husk cover and good tolerance to diseases (esp. GLS, MSV & Diplodia)	- Highly adapted to disease prone areas	- Reduce crop yield losses from leaf & cob diseases

DKC80-73: A high yielding medium-late maturing maize hybrid
